

World's Kitchen

Have you ever heard of a kitchen incubator?

In November 2008 South Sacramento will have a new facility with an exciting mission.

A kitchen incubator is a food preparation facility that is used by small food processors and caterers on a shared basis. Instead of preparing food in home kitchens or other unregulated environments, participants in *World's Kitchen* will use a modern, safe, health department approved facility. They will also have access to business loans and technical assistance to help assure their success. When their businesses outgrow the facility, these entrepreneurs will have the resources and experience to buy or lease a location that will serve their needs.

World's Kitchen will be housed in the new 41st Avenue Community Center facility which is being built at 41st Street and Martin Luther King Avenue. It will serve a vibrant industry of micro-entrepreneurs making and selling a variety of products including Asian sauces, Mexican salsas, tamales, South Pacific plantain chips, and catering services.

Implementing this project requires an immense amount of planning and organization. Here is your opportunity to make a tangible difference in the lives of people who are resourceful, ambitious and seeking a better life for themselves and their families. If you would like to aid us in our development of this kitchen please contact me.

Thank you for your time.

Sincerely,

Ana Rojas
